DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 21, 23-28, 29, and 31 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 6,259,683 (hereinafter referred as “Sekine”).

Regarding claims 24 and 25, Sekine discloses a cell search method of a mobile station comprising:

- (a) a receiving capturing step of receiving capturing, from a base station, phase difference information between a long period spreading code of a common control channel of said base station and a long period spreading code of a common control channel of a neighboring base station of said base station (see Fig. 4, abstract, col. 2, lines 65-67, col. 3, lines 1-14, col. 6, lines 64-67, and col. 7, lines 1-18);
- (b) a cell search step of carrying out cell search in accordance with the received phase difference information (see Figs. 2 and 4, col. 5, lines 48-65, and col. 7, lines 44-56).

Regarding claims 26-28, Sekine discloses A base station comprising:

- (a) storing means for storing phase difference information between a long period spreading code of a common control channel of said base station and a long period spreading code of a common control channel of a neighboring base station of said base station, the phase difference

information being captured from a mobile station (see Fig. 2, col. 7, lines 44-56);

- (b) management means for managing the phase difference information stored in said storing means (see Fig. 2, col. 8, lines 10-29).

Regarding claims 21, 23, 29, and 31, Sekine discloses A mobile station comprising:

- (a) phase difference information storing means for storing phase difference information between a long period spreading code of a common control channel of a base station and a long period spreading code of a common control channel of a neighboring base station of said base station, the phase difference information being captured from said base station (see Fig. 2, col. 7, lines 44-56);
- (b) cell search means for carrying out cell search in accordance with the phase difference information stored in said storing means (see Fig. 2, col. 7, lines 44-56).

Allowable Subject Matter

1. Claims 30 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
2. Claims 22, 33, and 32 are allowed.

Response to Arguments

3. Applicant's arguments with respect to claims 21 and 23-29 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

(1) US Patent 6,717,929 (Ooba) discloses multi-antenna radio apparatus with simplified circuit structure.
